‘TRANSITION’

‘Transition’ is defined as *‘The process or period of changing from one state or condition to another’* a word which represents an element of chaos and unknowing; a stage where the earth is shifting under our feet.

It’s a place of discomfort and active change but if we allow this process to unfold it leads into something new being born.

This body of work is an exploration of the pivot point between the seasons of dark and the return of the light - a place rich with potential here in the orchard.
